

HTP-25

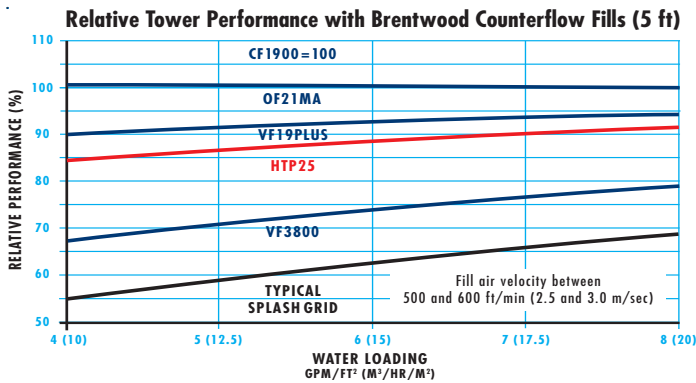

HTP-25 (Hybrid Trickle Pac) Fill Media is an injection-molded, counterflow film fill product that combines the advantages of both droplet and film cooling in one module. The highly-engineered drip design provides maximum thermal performance. The field-proven, environmentally-friendly "MA Assembly" technology eliminates the need for adhesives, solvents, or heat welding. And the open, offset-flute, fouling-resistant design is ideal for applications where the circulating water has very high levels of suspended solids.

FEATURES & BENEFITS

- Mechanical Assembly (MA) technology allows for proven, durable construction in either factory or field assembly with inexpensive, hand-held, pneumatic crimpers.
- Modules provide a minimum crush resistance of 500 psf (24N/m²), 5 times the typical requirement.
- Advanced geometry allows for over 6,300 drip points per cu. ft (224,000/m³).
- Can be used above PVC fill for high temperature applications or improved water distribution.
- Made from a UV-protected polypropylene copolymer. Fire retardant additives are available.
- Maximum continuous operation at 176°F (80°C).
- Available in standard 36" (914 mm) lengths, sheets can be lapped to create 72" (1829 mm) pack lengths.
- Can be cleaned with high pressure sprayers.

Over 6,300 drip points per cubic foot of media!

Open design is ideal for "dirty water" applications

ASSEMBLED PRODUCT

DIMENSIONS	MAX. SPAN	DRY WEIGHT
11.8"D x 12"W x 36"L (300 x 305 x 914 mm)	24" (610 mm)	4.5 lbs. (2 kg)
23.625"D x 12"W x 36"L (600 x 305 x 914 mm)	30" (762 mm)	8.9 lbs. (4 kg)
11.8"D x 12"W x 72"L (300 x 305 x 1829 mm)	30" (762 mm)	8.9 lbs. (4 kg)
23.625"D x 12"W x 72"L (600 x 305 x 1829 mm)	36" (914 mm)	17.8 lbs. (8 kg)
